

# Cisco Meeting App 1.11

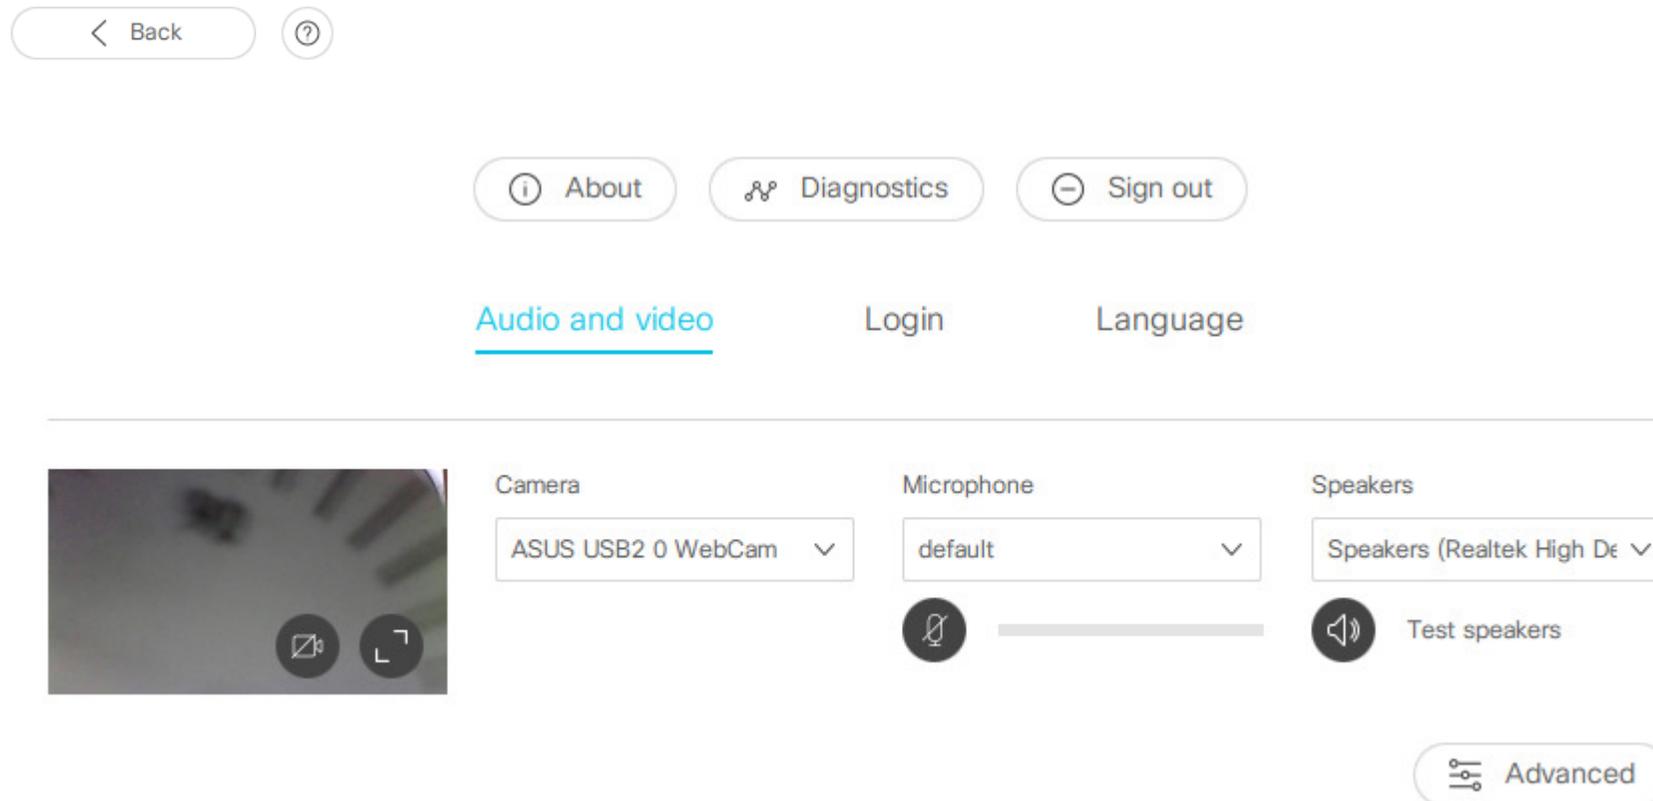

After the Cisco Meeting App is installed:

- 1) Click [Sign In](#)
- 2) Enter the provided Username in the format `xxxxxxxx@hdvideoplatform.com`
- 3) Enter the provided Password
- 4) Click to [Sign-In](#)

\*We suggest you to use a headset or at least an earphone to avoid echo and noise during the videocall

# Cisco Meeting App 1.11

**Audio and Video:** Adjust and verify your local resources (camera, mic and speakers).

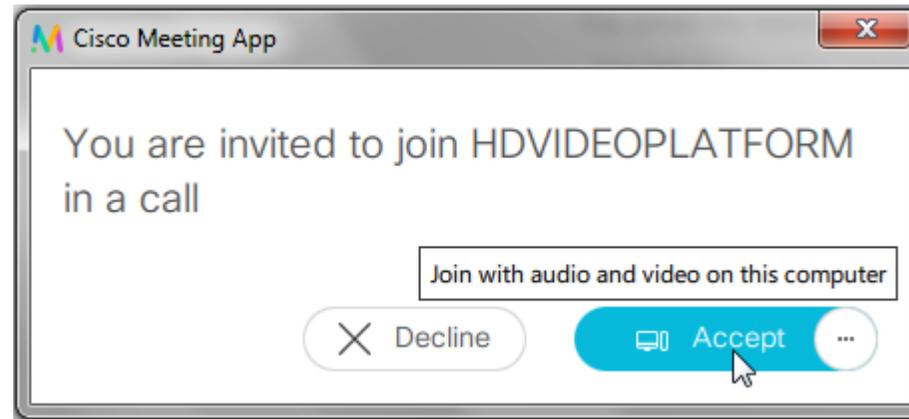

**Login:** To select if you want to remember the user or automatically start with the OS

**Language:** Adjust to your preferred Language

PS: This screen may be accessed later, clicking at the Settings icon

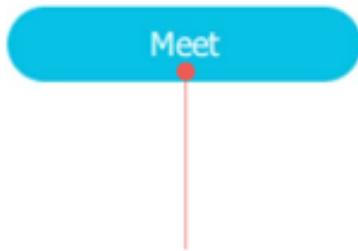

# Cisco Meeting App 1.11

With your local resources adjusted and verified, you will be signed in and ready for calls.

When you receive a call, your device will show a popup on screen and you need to click the [Accept](#) button to Answer the call.

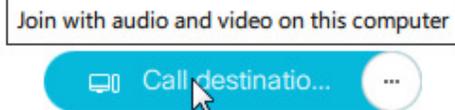

# Cisco Meeting App 1.11

Click on the **Meet** button from the main screen

## Start or join a meeting

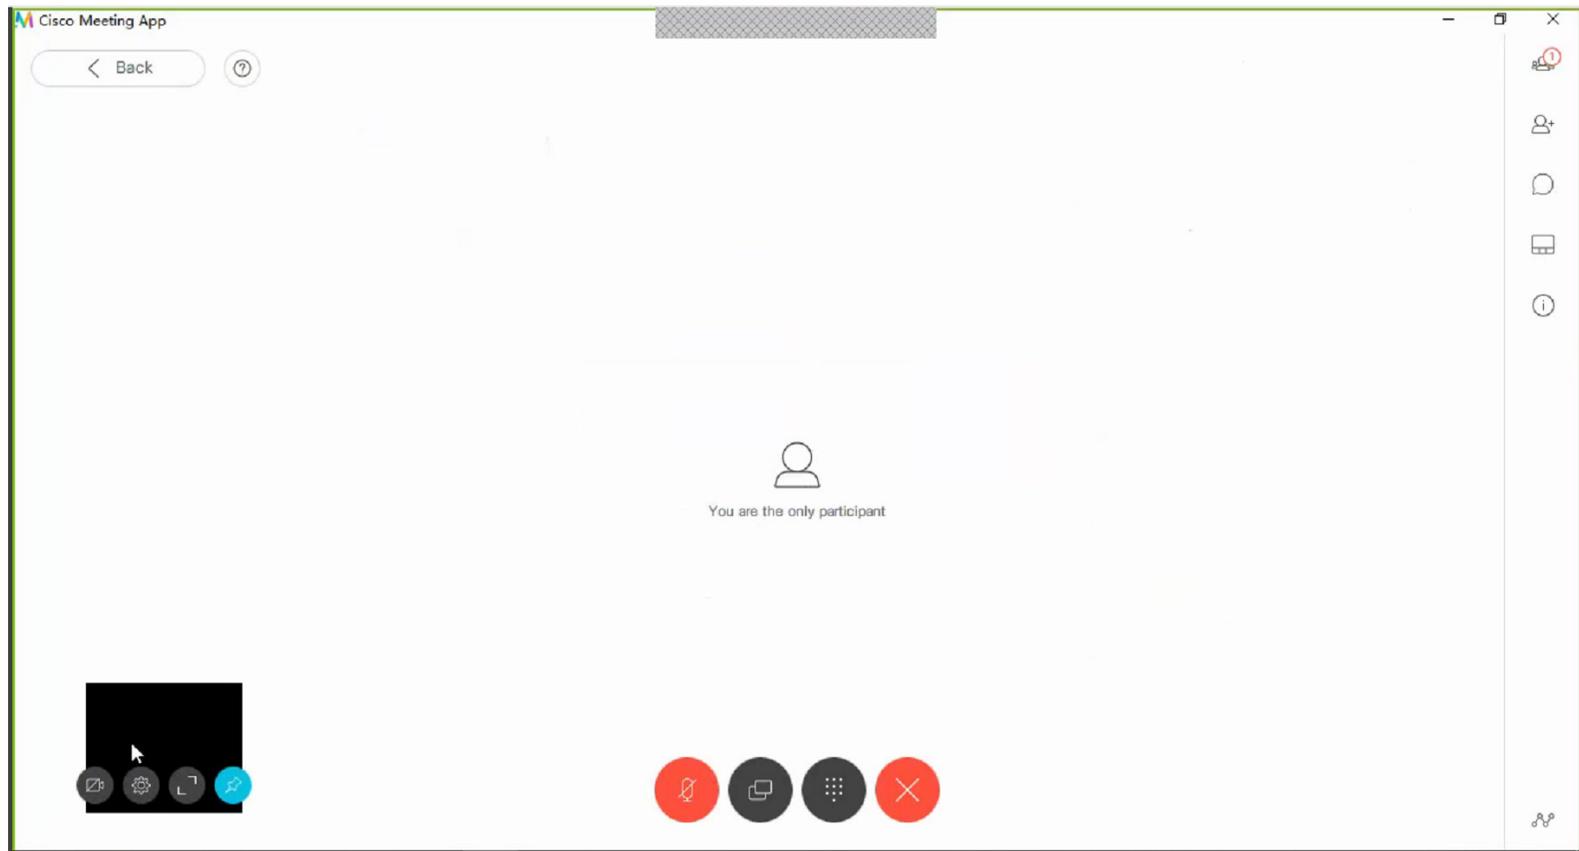

Search for video addresses, phone numbers or people, or enter a space address or the meeting link from an invitation.

To initiate a call you need to click at the **Meet** button at the left upper corner on main screen.

When the Start a meeting page opens, enter the URI at the main field and select the **Call** button to start the call.

# Cisco Meeting App 1.11

In a call, the control buttons will appear when you move the cursor over the screen.

You can mute audio, video, open the dial pad to send DTMF digits, share your screen or disconnect the call.

To Sign out from the CMA, disconnect any call in place, select the [Settings](#) icon at the main page and then choose the [Sign Out](#) button.
